# GARIBALDI ARCHITECTS

With a broad portfolio of projects in Italy and abroad, Garibaldi Architects ranks as a dynamic and innovative architectural firm capable of combining creative and conceptual aspects with those of planning and economic appraisal.

Alessia Garibaldi – founder and principal partner – has created a unique professional reality where the skills and expertise of each collaborator, though always well defined, are integrated and significantly broaden the degree of flexibility and response on multiple and varied projects.

Thanks to a level of detail that is capable of responding to representation needs as well as commercial objectives, Garibaldi Architects is the go-to architectural firm for multinationals, luxury brands and major companies active in the real estate sector.

## FOUNDER

Architect and interior designer, Alessia Garibaldi graduated from the Faculty of Architecture of the Politecnico in Milan. She internalised the aesthetic lesson of international rationalism: formal symmetry, volumetric order and spatial function are defined by the choice of the finest natural materials, and the design of precious handcrafted finishes.
